

Winkhaus Slider Door Lock

Functional Fenestration Inc (FFI) is now the exclusive North American source for select Winkhaus products.

parts exposed to the elements are stainless steel: face-plate, hooks and strikes

Flat 9mm 20mm

Slider Lock and Strikes

Applications

- Sliding doors in wood, fiberglass, aluminum, or vinyl/pvc.
- Exterior or interior doors; 1-3/4" or 2-1/4" thickness.

Benefits

- Stainless steel face-plate, hooks and strikes.
- Easy to operate.
- 90° cylinder thumbturn provides visual locking indicator.
- Double-hooks are spring-loaded and automatically latch behind strike plate.
- Anti-slam feature prevents unintentional locking and damage during operation.
- Hooks engage in opposing directions for security protection from lift-out.

Features

- Lock backset: 28 mm (1-1/8").
- Lock center: 92 mm (3-5/8").
- Lock spindle hub: offset, for 8 mm square spindle.
- Face-plate: stainless steel 304 grade brushed, 20 mm (13/16") wide, 370 mm (14-1/2") tall, 2.5 mm thick, with arched ends.
- Lock materials: stainless steel face and hooks, galvanized steel body.
- Hooks are stainless steel 304 grade and adjust in or out +/- 2 mm.
- Strikes: 3 options, 304 stainless steel brushed, adjustable on installation.
- *Screws not included. (Use #7 or #8, 2 per lock, 4 per strike.)*

Brass Door Handles for Slider Lock

Botticelli

Fontana

 Mercury
(PVD Ultra Steel only)

Volo

Decorative Door Handle trim set features

- Compatibility: recommended for the Winkhaus Slider Lock; other handles may not be compatible.
- Material: high quality brass.
- Escutcheon: 34 mm (1-3/8") wide, 222 mm (8-7/8") long, 10.5 mm (3/8") proud, arched ends.
- Ergonomic handle design (avoids "knuckle-busting").

Handles are sold in kits with left-handed & right-handed handle, spindle, allen wrench, foam gasket, screws, cylinder (when applicable) and instructions included.

Choice of 4 handle styles: Botticelli, Fontana, Mercury & Volo.*

Handle finishes — choices vary by handle; check for availability:

Oil-Rubbed Brass (613) PVD Bronze (739) White (714) () = BHMA code
 Antique Brass (609) PVD Bright Brass (723) Flat Black (622) PVD Ultra Steel (748)

Choice of 3 plate functions:

1. Keyed entry — full cylinder with key and thumb-turn knob.
2. Patio function — half cylinder with thumb-turn knob only.
3. Inactive function — blank (dummy) plates with no cylinder.

To order handle set kits, the following information is needed: handle style, handle finish, function, and door thickness. See FFI catalog Section D for part code grid.

* All styles and finishes cannot be in stock at all times; ask about current availability.

Winkhaus 90° Cylinder features

- The Winkhaus Slider Lock requires the Winkhaus 90° Cylinder. All handle set kits include a cylinder as appropriate (with screw, collar, 2 keys, and needle tool).
- Cylinder has 90° locking turn. Vertical position is unlocked, horizontal position is locked.
- Cylinder knobs pictured are shown in vertical, unlocked position.
- Cylinders are "Schlage C" re-keyable.
- Keyed-alike cylinders are available.

Keyed Cylinder Finishes

Dark Bronze

Bright Brass

Nickel

Full cylinder faces are in 3 finishes:

Dark Bronze (for handle finishes orb/613, pvd bronze/739, black/622)

Bright Brass (for handle finishes antique brass/609, bright brass/723)

Nickel (for handle finishes white/714, pvd ultra steel/748)

Cylinders are for 2-1/4" or 1-3/4" door thicknesses*, with lock centered in stile:

35/30 full cylinder	key + thumb-turn	centered	for 2-1/4" doors
00/30 half cylinder	thumb-turn only	centered	for 2-1/4" doors
30/20 full cylinder	key + thumb-turn	centered	for 1-3/4" doors
00/20 half cylinder	thumb-turn only	centered	for 1-3/4" doors

* All styles and finishes cannot be in stock at all times; ask about current availability.

Use this decorative hardware with the Winkhaus Slider Lock system (see reverse side).
