

Synchro-Vega Actuator Features

- Synchro-Vega actuators are for awning windows, hoppers, curtain wall vents and skylights.
- Synchro-Vega is for wide vents that require 2 to 4 motors, providing multiple sash connection points and synchronized operation. Available in DC version only.
- Multiple vents can be wired in parallel, and can be operated by building automation systems.
- 12” chain operator; self-adjusting for proper closure at installation.
- Operator has stainless steel, double-link chain for rigidity and durability.
- Examples of 55 lbs operating force of 2 motors: 48” tall/880 lb vent; 82” tall/1504 lb vent; or 220 lb skylight.
- Low-profile, attractive aluminum case; available in black, white or gray paint.
- Minimum sash height is 10”. Standard pivot brackets included.
- Synchro-Vega F-Signal (DC) has opening and closing feedback signal, ask for data sheet.
- Two-year UCS manufacturer’s warranty. Requires reading FFI Install Guide before purchase, and confirmation of project and installation specs by licensed electrical contractor.
- Functional Fenestration Inc (FFI) has a wide range of actuators for institutional, commercial and residential applications. FFI has been providing motorized operators for windows and skylights since 1987, and today is an expert and leader in actuators for automation, natural ventilation, and smoke evacuation.

Synchro-Vega Specifications

	Synchro-Vega DC UL
supply voltage	24 Vdc ± 10% low voltage
normal current amp draw*	0.7 amps average*
power cable (3 m)	white color; 2 conductors (± polarity inversion)
chain stroke	300 mm (12 inches)
chain speed	9 mm (0.354”) per second
limit stop	electronic limit switch
safety stop	electronic overload switch
typical switch	DPDT maintained contact (6 leads)
safety marks	ANSI/UL Recognized; CE
UL projects	UL Recognized
push/pull force	55 lbs (250 N)
environment	14 to 140 degrees F (-10 to 60 degrees C); maximum relative humidity 60%
control options	Wall switch or CRM keypad; add remote control and weather sensors (rain, wind, thermostat) with CRM

* Vega DC start up current is approximately 1.67 amps for one actuator. Calculate power supplies and relay boxes needed based on peak draw of 2 times normal amp draw, or approx. 1.67 amps per actuator.

Application Options

On Wall or Frame

Awning

Skylight

Hopper

Concealed in Frame or Curtainwall

- Optional brackets may be required for hopper and wall mounting.
- Read FFI Installation & Maintenance Guide before specifying project details.
- CAD files available on request from FFI.

installs on sash, sill or wall

chain operator attached to frame

standard pivot brackets (included)
